

FINANCIAL INTELLIGENCE | V1

A financial analysis you can inspect.

Northstar Manufacturing Ltd | Income Statement | FY 2025 | EUR

Demonstration scope

This sample uses a fictional company and pre-validated data to demonstrate Entimema's controlled workflow. It is not a customer analysis or a live execution.

WORKFLOW STATUS	Review ready	One mapping requires confirmation
SOURCE	1 statement	Six reported lines retained
CONTROL	Passed	Gross profit reconciles
OUTPUT	Traceable	Evidence and exceptions preserved

DECISION USE

The report separates reported facts, deterministic calculations and items requiring human judgement. A decision-maker can inspect what is supported, what is calculated and what remains unresolved before relying on the output.

SOURCE	INTERPRET	VALIDATE	REVIEW	OUTPUT
--------	-----------	----------	--------	--------

01 | EXECUTIVE SUMMARY

What the statement supports.

Northstar reports FY 2025 revenue of EUR 12.48m, gross profit of EUR 4.12m and EBITDA of EUR 1.36m. Gross margin is 33.0%, EBITDA margin is 10.9% and net margin is 6.6%.

The statement demonstrates positive profitability at each reported level. It does not establish earnings persistence or cash conversion. No comparative period, balance sheet, cash flow, budget or operational-driver evidence is included.

Review required

The source line 'Administrative and other' is provisionally mapped to Operating expenses. The value is retained exactly as reported, but the classification requires human confirmation.

REVENUE	EUR 12.48m	Reported and traced
GROSS MARGIN	33.0%	Deterministic
EBITDA MARGIN	10.9%	Deterministic
NET MARGIN	6.6%	Deterministic

Decision interpretation

The available evidence supports a profitability reading, not a complete financial-health conclusion. Credit, investment, liquidity or covenant use requires additional evidence and explicit decision criteria.

02 | STRUCTURED STATEMENT

Reported values and controlled calculations.

Financial line	FY 2025	Origin	Status
Revenue	EUR 12,480,000	Reported	Traced
Cost of sales	(EUR 8,360,000)	Reported	Traced
Gross profit	EUR 4,120,000	Reported	Reconciled
Gross margin	33.0%	Calculated	Passed
Administrative and other	(EUR 2,760,000)	Reported	Review
EBITDA	EUR 1,360,000	Reported	Traced
EBITDA margin	10.9%	Calculated	Passed
Net income	EUR 820,000	Reported	Traced
Net margin	6.6%	Calculated	Passed

Gross profit reconciliation

EUR 12,480,000 revenue - EUR 8,360,000 cost of sales = EUR 4,120,000 gross profit. Difference: EUR 0. Status: passed.

03 | EVIDENCE AND CONTROL

How each conclusion can be inspected.

Object	Evidence retained	Control conclusion
Revenue	Source label, period and EUR 12,480,000	Directly traced
Gross profit	Revenue and cost-of-sales lines	Arithmetic passed
Gross margin	Gross profit / Revenue	33.0%; deterministic
Administrative and other	Source label and EUR 2,760,000	Mapping review required
EBITDA margin	EBITDA / Revenue	10.9%; deterministic
Net margin	Net income / Revenue	6.6%; deterministic

Epistemic boundary

Reported values are facts within the supplied demonstration statement. Margins are deterministic derivations. The operating-expense mapping is a proposed interpretation. Future performance, liquidity and decision suitability remain unknown within this scope.

04 | REVIEW AND LIMITATIONS

What must happen before reliance.

Review item	Required action	Effect before resolution
Operating-expense mapping	Confirm the proposed canonical category.	Classification remains provisional.
Comparative interpretation	Provide a prior period or budget.	No trend claim is supported.
Cash conversion	Provide balance sheet and cash flow evidence.	Profitability is not treated as liquidity.
Decision use	Define decision and materiality thresholds.	No approval or credit recommendation is issued.

Next controlled step

A paid pilot applies the same control logic to an agreed customer scope inside a restricted Entimema Workspace. Scope, formats, review responsibility, output and price are confirmed before execution.

Commercial path

Configure pilot -> confirm scope and offer -> pay securely -> receive restricted Workspace access -> run the agreed financial workflow.
